## **CITYBUS RELEASES COVID-19 EMERGENCY SERVICE PLAN**

LAFAYETTE, IN, March 16 - CityBus has prepared an emergency service plan in the event that a significant portion of the staff is unable to report for duty.

Some campus loop and apartment shuttle services will be reduced until further notice beginning Monday, March 23. This is due to Purdue University's decision to move to an online class schedule.

"The health and safety of our employees and riders is our top priority," said Bryce Gibson, manager of development. "We are taking additional measures to ensure the cleanliness of our vehicles, but we encourage our riders to limit all nonessential travel at this time."

Riders can learn about service reductions from [gocitybus.com](http://gocitybus.com), the [MyCityBus app's](#) "News" section, CityBus's [Facebook](#) and [Twitter](#) pages, and the customer service line (765-742-RIDE). They can also sign up for route-specific alerts on the MyCityBus app.

CityBus will make every effort to announce service reductions the evening before they take place. But riders should refer to the route schedules on the MyCityBus app for the most up-to-date information. Canceled trips will be crossed out on the MyCityBus schedule. CityBus will also post a service alert for each reduced route on the website.

The emergency plan will inform both CityBus staff and riders of any service changes. Visit <https://gocitybus.com/alerts> to find the plan and see the latest news from CityBus.
