

FOR IMMEDIATE RELEASE

CITYBUS DRIVERS TEST POSITIVE FOR COVID-19

LAFAYETTE, IN, November 2, 2020 - Two CityBus drivers have tested positive for coronavirus. CityBus received confirmation of the test results from both employees on November 2.

The first employee last drove a bus on Friday, October 30. The operator drove routes 1A Market Square and 4A Tippecanoe Mall October 23-24 and October 27-30.

The second employee last drove a bus on Thursday, October 29. The operator drove route 17 Ross Ade on October 23 and routes 2A Schuyler and 2B Union October 26, 28, and 29.

Anyone who rode these routes within the last seven days should monitor themselves for possible COVID-19 symptoms. If you develop a fever, dry cough, aches, fatigue, or other symptoms, contact your healthcare provider immediately. Then, isolate yourself and avoid public transportation to keep from exposing others.

“Our top priority is the safety of our riders and staff,” said Bryce Gibson, CityBus manager of development. “We’ll continue taking necessary steps, such as sanitizing all vehicles and facilities daily, to ensure everyone boarding the bus enters a safe environment.”

ABOUT CITYBUS

CityBus (Greater Lafayette Public Transportation Corporation) is a municipal corporation established in 1971. CityBus provides over 5 million annual rides for Greater Lafayette passengers, including ADA paratransit services for people with disabilities.
